Manuscript Checklist: Art and Science of Osteopathic Medicine

Manuscripts of this type are brief reviews summarizing evidence on a specific clinical question.

- Cover letter addressed to AOA Editor in Chief Robert Orenstein, DO, with any special requests (e.g., rapid review) noted and justified
- A title page including the following information about all authors:
  - full name, degrees, title, and affiliation
  - contact information
  - financial disclosures
- An acknowledgment section with a concise, comprehensive list of the contributions made by individuals who do not merit authorship credit and permission from each individual to be named in print
- Manuscripts in this category should consist of the following sections:
  - Abstract (<200 words)
  - Clinical vignette (<300 words)
  - Up-to-date review of the pathogenesis of the condition (<2000 words)
  - Hypothesis-generating conclusion (<200 words)
- Should be kept to 2500 words, 30 references, and 1-2 figures, if appropriate
