Manuscript Checklist: Reviews in Musculoskeletal Medicine

Manuscripts of this type are brief reviews summarizing evidence on a specific clinical question.

☐ Cover letter addressed to AOA Editor in Chief Robert Orenstein, DO, with any special requests (eg, rapid review) noted and justified

☐ A title page including the following information about all authors:
  ☐ full name, degrees, title, and affiliation
  ☐ contact information
  ☐ financial disclosures

☐ An acknowledgment section with a concise, comprehensive list of the contributions made by individuals who do not merit authorship credit and permission from each individual to be named in print

☐ Manuscripts in this category should consist of the following sections:
  ☐ Introduction, describing the problem or clinical question (1-2 paragraphs)
  ☐ Discussion of what is already known and the state of current research (1-2 paragraphs)
  ☐ Assessment of recent literature, including limitations and need for future research in the field (3-5 paragraphs)
  ☐ Definitive conclusion as to the meaning of the articles reviewed and future directions (1 paragraph)

☐ Should be kept to 1500 words and 20 references
